

Взято: <http://social.technet.microsoft.com/Forums/windowsserver/en-us/b9e5a4c0-073c-42fd-a390-8b2aee407a4f/task-scheduler-service-schedule-cannot-be-stopped-in-windows-2008-r1->

you may also disable (or change) the startup process on the SCHEDULE service with the following:

PSEXEC -i -s CMD

(this opens a CMD prompt with the "NT AuthoritySYSTEM" account)

SC CONFIG SCHEDULE start= demand *(changes start to MANUAL)*

SC CONFIG SCHEDULE start= disable *(changes start to DISABLED)*

SC CONFIG SCHEDULE start= auto *(changes start to Automatic)*

in any case, once you have this SYSTEM CMD prompt, you do **NOT** need to change the startup mode for the SCHEDULE service, but rather simply STOP the service as follows:

SC STOP SCHEDULE

or **NET STOP SCHEDULE**
